

Large Format. Small Investment.

RPG Squarefoot Solutions®

Choose your solution. As easy as 1, 2, 3...

RPG's Squarefoot Solutions is a way to gain control and convenience over your wide format printing by having RPG place xerographic, inkjet and scanning digital equipment solutions right in your location. There is no capital outlay to make on an engineering copier/printer purchase since you will be billed on a cost per square foot usage basis. This unique program also includes unlimited supply of 20lb bond media, full service maintenance, and toner supplies.

The main 3 types of RPG's Squarefoot Solutions programs are outlined below. Each program can be customized to fit your environment. From having space limitations to needing postscript, or the ability to print large color documents, RPG can outfit your firm with the tools you need to grow!

In-House Convenience Printing

Xerox 6204

This is Xerox's brand new breakthrough printer/copier. Prints up to 5 D-size black and white prints per minute (50 in 10 minutes!) This high quality, low cost system takes up a small amount of space for use anywhere. Scan, Copy and Print drawings for an array of applications. Enlarge or reduce plans from 25 – 400% with image quality controls that include "inverse" and "transform" to make positive prints from old blue prints. Print easily from AutoCAD, MicroStation, or Windows programs with the BT Plot Assistant. Scan documents to popular file formats for sending over the web, or organize your workspace by scanning and indexing your old plans.

- Print from CD
- Scan to file
- Single footprint

\$599 per month* includes 1000 sqft coverage@\$.14/sqft

In-House Production Printing

Xerox 510dp

This is Xerox's engineering printer/copier production workhorse. The powerful imbedded controller features auto port sensing, auto data format recognition, auto scaling, auto rotation, size reduction, roll select and electronic collation. Take everything the Xerox 6204 does and add speed, flexibility, and an array of upgradeable, scaleable options. Start out with a basic configuration, and add features as you need them. Go from 5 black and white D-size prints per minute to 10, increase productivity by adding up to 2 more media drawers. Increase scanning speed to 7.6 inches per second, with the option of color scanning. This printer/copier has superb print quality with excellent edge-to-edge accuracy. You'll see blacker fills, and crisper, finer lines. Even with high printing volume, this printer continues operating with no increase in service maintenance. All of this plus renowned durability and ease of use.

- 10 D-size pages per minute
- Scan in color
- Stack up to 1000 prints
- Scan to PDF and FTP

\$799 per month* includes 3000 sqft coverage@\$.14/sqft

In-House Color Printing

HP DJ 4500

Finding that color fires up the creativity in your designers and sells better to your clients? Here's a wide format solutions that can handle your black and white engineering drawings as well as your eye popping renderings or marketing materials. The 2 roll media option guarantees increased productivity. Add the high speed color scanner and turn this fast plotter into a wide format color copier.

Perfect for GIS applications.

This color solution has the capability to manage printer, ink and media usage remotely by an embedded web server. Recapture expensive color printing costs!

- Full color copies
- 2 D-size pages per minute
- Scan to network
- Store and reprint

\$799 per month* includes 500 sqft coverage@\$.20/sqft + .59/ml
