SYNERGIX 8825 DS WINS AWARD

SYNERGIX 8825 DIGITAL SYSTEM WINS CADENCE EDITOR'S CHOICE AWARD

The Synergix 8825 Digital System has won a Cadence magazine's Editor's Choice Award. Twice a year CADENCE staff editors, contributing editors, and reviewers take time out to reflect on the CAD-related products and services that they feel have done the most to raise the bar on excellence and technology innovation over the past six months or so. The Synergix 8825 DS was awarded 4 ½ out of a maximum 5 stars.

The Synergix 8825 will be featured in the December issue alongside the other award winners.

Additionally, the Synergix 8825 will be featured in a formal product review in the November 2001 issue of Cadence. In November we also anticipate the publication of a review of the X2-TECH in CADALYST magazine.
