Fujitsu offers a portfolio of capture software that can help you leverage and optimize what's most important on documents - the data. Our solutions increase business efficiency, reduce costs, and minimize resources. Scalable, high quality, and comprehensive, the portfolio offers a range of solutions that enable you to integrate a capture offering that matches your business needs and overall capture goals.

Let us design a solution that fits your needs. To learn more and get a no-obligation quote for your business, call us at 888.425.8228.

PaperStream Capture Pro complements Fujitsu fi Series scanners and improves business efficiency by offering superior front end capture, image processing, and options for enhanced data extraction and indexing for release.

PaperStream Capture, included with Fujitsu fi Series scanners, delivers enhanced images to save time and money. Built upon PaperStream TWAIN and ISIS drivers, PaperStream Capture is a simple, front end scanning software.

The industry-recognized PaperStream IP TWAIN and ISIS drivers apply powerful and unique image correction to Fujitsu fi Series scanners, allowing documents to be quickly converted into exceptionally high quality images in small sizes.
