

## 36" 42" 60"

### A NEW STANDARD IN LARGE FORMAT SCANNING

### **High-quality lenses**

Contex CCD scanners use premium Fujifilm lenses to bring you highresolution images in the best quality available on the market today.

**Instant-ON feature** Save valuable time with the ability to start scanning without warm-up time.

**True size detection** HD Ultra X finds the paper width automatically as it scans.

OTAC (Optimal thick ness adjustment control) Quickly and easily adjust the scanner to the thickness of any original.

### Speed adjustment

Three different speed levels on the touch panel makes it easy to adapt the scanner to your workflow and the requirements of the original.

# MORE POWER, BETTER PERFORMANCE, HIGHER PRODUCTIVITY

**Productivity.** The HD Ultra X series is the epitome of productivity. It doesn't require warm-up time, it's super-fast, it detects your paper size instantly, and it transfers data onto your screen faster than any other large format scanner on the market.

**Quality.** With its CCD technology, HD Ultra X matches the color of your originals like no other. You get crystal-clear scans with an unequalled sharpness. Add our Nextimage 5 software, and you can clean-up your high-quality scans and improve the look of your originals.

**Flexibility.** The HD Ultra X series just makes life easier. Load originals where you want and adjust the thickness capacity up to 15 mm to capture artwork, blueprints, photography, maps, and more. It's everything you need, all from one machine.

**Workflow.** This series has three solutions to choose from: the standalone solution, the All-In-One (AIO) solution or the ScanStation Pro solution. Whatever you need we have the fit for you.

\* = Upgradable to 42 inches (1067 mm)1. Requires optional scanner stand.

Contex recommends Intel Core Duo, Core 2 Duo, or better 64-bit processors, 8 GB RAM and SSD SATA drive. Speed tests performed using Nextimage software, PC with Intel Core i7 4770K 3.5 GHz ,16 GB RAM, SSD – 1TB, USB 3.0 SuperSpeed and Win 64-bit.

3. Contex applications create industry standard raster file formats that can be used in any CAD or GIS application.

4. Requires optional Nextimage5 software.

### The various solutions adapt to the way you work and fit seamlessly into your workflow

Operate your Nextimage software from a PC separate from the stand

Nextimage Remote 6

Remote control Nextimage software from your tablet

Operate Nextimage software directly on your scanner

Contex solutions are compatible with all leading large-format printers. See the full list at contex.com/nextimage-supported-printers
