

It's Time to Rethink IT

A game-changing solution for the chronic problems and resource drain of keeping your I.T. infrastructure intact, current and most importantly: **EFFECTIVE.**

It's time to stop the endless cycle of maintaining and upgrading your IT equipment. With RPG Complete/IT, you'll never have to buy another PC again! How so? Thanks to our "Thin Clients," your computer is virtual and is linked to data centers. The data centers are comprised of interlinked super computers that replicate your existing PC and will eliminate the drain on your resources from constantly updating and placing equipment.

Think about IT... The value to your business' information technology is in what it "does" – not what it "is". Yet companies spend more resources on buying, maintaining and updating IT than the very thing they're in business to do!

Complete/IT delivers everything you're accustomed to and rely on IT for while freeing your company from the endless burden of capital investment, maintenance and keeping up-to-date. The Complete/IT Utility Model also allows your business to purchase only the technology that you use from a month-to-month basis enabling you to stay flexible and effective.

COMPLETE/IT BENEFITS

Technology Refresh

Complete/IT delivers a brand new IT Home: new servers, new Virtual PCs and new Thin Clients; all with \$0 capital investment. Never buy another computer again.

Support

Complete/IT is monitored, maintained and upgraded 24/7 right here in the United States. Our help desk is open all night if you need to chat.

Scalability

Opening new locations, hiring new employees, or even downsizing is quick and painless since you only pay one low utility fee per-user.

Disaster Recovery

Your hardware, software, data and IT support are 100% backed-up in redundant data centers. Now that's a disaster plan!

Mobility

Complete/IT users access their desktops from anywhere with their Thin Clients, personal computers, laptops, tablets and smart phones.

Security

Since your critical data resides in secure data centers, a lost or stolen laptop will not compromise your sensitive information.

The Utility Fee Includes:
