

TECHNOLOGY SOLUTIONS FOR THE CONSTRUCTION INDUSTRY

Transforming Communications in Design and Construction

Leica RTC360

The RTC360 automatically pre-registers point cloud data in the field to quickly conduct quality control checks, improve productivity and make better-informed decisions on site.

- Highly portable, highly automated, intuitive and designed for maximum productivity
- Capture scans, including HDR imagery, in less than 2 minutes
- Automatically record your moves from station to station to pre-register your scans on site
- Augment your data capture with information tags illustrating the opportunities for better planning

Leica BLK360

The BLK360 captures the world with full-color panoramic images overlaid on a high-accuracy point cloud. Simple to use with the push of one button, it is the smallest and lightest imaging laser scanner of its kind.

- Captures 360,000 pts/sec, panoramic HDR imagery, and has thermal imaging capability
- Less than 3 minutes for full-dome scan (in standard resolution) and 150 MP spherical image generation
- Automatically capture, register and examine scan and image data, directly within the Cyclone FIELD 360 app

Leica BLK3D

The BLK3D is designed to make your measurements faster and easier. It will help you fully document your work, including as-built conditions and project progress.

- Every image captured is a complete and precise 3D measurement record
- Uses advanced algorithms for edge detection and measuring within 2D pictures
- Similar to a smartphone in shape, size, and operation
- Easily organize your projects by tagging measurable images for easy recall and share them in multiple formats
