

## RPG Squarefoot Solutions Acquires Digital Color Ink, LLC

**Two of the Mid-Atlantic region's leading wide format experts join forces.**

Vienna, VA, September 19, 2022 – RPG Squarefoot Solutions (RPG), a technology solutions provider, has acquired Digital Color Ink, LLC (DCI), a wide format digital printing supplier. The move to acquire DCI first began in early 2022 and was completed on September 1, 2022.

RPG, founded in 1991, is a woman-owned, small business based in the Washington DC metro area supporting Commercial, Government, A/E/C/O, and Print Service Providers throughout the United States. RPG represents many industry manufacturers and has been awarded for top sales and service performance for HP and Xerox. RPG holds Government, State, and local contracts and focuses on continued technical training and ventures into technological offerings that are changing the industry. Additionally, RPG recently became an official Leica Geosystems dealer.

DCI, founded in 2002, provides wide format graphic printing supplies, equipment, and solutions primarily in the Mid-Atlantic area. Having built a team of highly experienced wide format graphic application specialists, DCI has provided the highest standard of quality products and services for over 17 years.

With a shared commitment to providing excellent customer service, quality products, and services, the core values of DCI and RPG directly align. The acquisition of DCI enables RPG to provide a larger selection of wide format graphic supplies and equipment to their customer base. RPG's manufacturer-certified technicians also bring an added dimension to DCI's current clients.

"We are excited to add the Digital Color Ink team to the RPG organization. Their industry expertise will enable RPG to offer comprehensive equipment, media, and services to the wide-format graphics color marketplace," said Laura Kadonoff, owner of RPG.

RPG's mission is to transform communications. For DCI customers, RPG's services and solutions include the following additional services and solutions: expansion of wide format printers and scanners, office printers and scanners, wide format graphic and office supplies, equipment service, 3D laser scanning hardware and software, reality capture services, managed network services, and CAD software.
